

TOKEN	DESCRIPTION	Template where it can be used
Title		
[EasyDNNnews:Title]	Description: Article title. Example: This is article title	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Title:Limit:20]	Description: Article title limited to 20 characters length. ** Example: This is article ...	<ul style="list-style-type: none"> o List_
[EasyDNNnews:Title:Link]	Description: Link that opens article details. * Example: http://site.com/article...	<ul style="list-style-type: none"> o List_
Subtitle		
[EasyDNNnews:SubTitle]	Description: Article subtitle. Example: This is article subtitle	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:SubTitle:Limit:20]	Description: Article subtitle limited to 20 characters length. ** Example: This is article ...	<ul style="list-style-type: none"> o List_
[EasyDNNnews:IfExists:SubTitle], [EasyDNNnews:EndIf:SubTitle]	Description: Checks if article subtitle exists and then displays content between the tokens. If the subtitle does not exist the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews: IfNotExists:SubTitle], [EasyDNNnews:EndIf:SubTitle]	Description: Checks if article subtitle exists and if it does not then displays content between the tokens. If the subtitle does not exist the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ o Details_
Summary		
[EasyDNNnews:Summary]	Description: Article summary. Example: This is summary This is summary This is summary	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Summary:Limit:30]	Description: Article subtitle limited to 30 characters length. Example: This is summary This is ...	<ul style="list-style-type: none"> o List_
[EasyDNNnews:IfExists:Summary] [EasyDNNnews:EndIf:Summary]	Description: Checks if article summary exists and then displays content between the tokens. If the summary does not exist the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ o Details_

<p>[EasyDNNnews:IfNotExists:Summary] [EasyDNNnews:EndIf:Summary]</p>	<p>Description: Checks if article summary exists. If does not exists then displays content between the tokens. If the summary exists the content between tokens is deleted.</p>	<ul style="list-style-type: none"> o List_ o Details_
Main article text		
<p>[EasyDNNnews:Article]</p>	<p>Description: Main article content.</p> <p>Example: This is article content This is article content This is article content</p>	<ul style="list-style-type: none"> o List_ o Details_
<p>[EasyDNNnews:Article:Limit:300]</p>	<p>Description: Main article limited to 300 characters length.</p> <p>Example: This is article content This is article content ...</p>	List_
Read more		
<p>[EasyDNNnews:ReadMore]</p>	<p>Description: Link to article details.</p> <p>How to use it template: </p>	List_
<p>[EasyDNNnews:ReadMore:Title]</p>	<p>Description: By default it shows "Read more" or it canbe set into something else in .rescx file.</p> <p>How to use it template: [EasyDNNnews:ReadMore:Title]</p>	List_
Article details		
<p>[EasyDNNnews:IfExists:Details], [EasyDNNnews:EndIf:Details]</p>	<p>Description: Checks if article detail type is set to text and then displays content between the tokens. If the article detail type is not set to text the content between tokens is deleted.</p>	List_
<p>[EasyDNNnews:IfNotExists:Details], [EasyDNNnews:EndIf:Details]</p>	<p>Description: Checks if article detail type is not set to text and then displays content between the tokens. If the article detail type is set to text the content between tokens is deleted.</p>	List_
<p>[EasyDNNnews:IfExists:DetailType:...] [EasyDNNnews:EndIf:DetailType]</p>	<p>Description: Checks if article detail type is set to specified type and then displays content between the tokens. If the article detail type is set to text the content between tokens is deleted.</p> <p>Values for detail type: Text, Page, Link, File. Example token: [EasyDNNnews:IfExists:DetailType:File]</p>	List_

	Article detail is file. [EasyDNNnews:EndIf:DetailType]	
Article image and media		
[EasyDNNnews:Image]	Description: Main article image. How to use it in template: 	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Image:Width:100:Height:100]	Description: Main article image with width and height set.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Image:Visibility]	Description: If the image does not exist it does not shows the element where is set. Example: <div class="imageclass" [EasyDNNnews:Image:Visibility]> </div>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:IfExists:Image] [EasyDNNnews:EndIf:Image]	If an image exists then the content placed between these tokens will be displayed.	<ul style="list-style-type: none"> o Details_
[EasyDNNnews:IfNotExists:Image] [EasyDNNnews:EndIf:Image]	If an image does not exist then the content placed between these tokens will be displayed.	<ul style="list-style-type: none"> o Details_
[EasyDNNnews:IfMediaType:Image] [EasyDNNnews:EndIfMediaType]	Description: Between these two tokens you can place the HTML that would be show if the main article image is set.	<ul style="list-style-type: none"> o Details_
[EasyDNNnews:IfMediaType:EmbedMedia] [EasyDNNnews:EndIfMediaType]	Description: Between these two tokens you can place the HTML and the token that will be shown in the main article is set to another media than image.	<ul style="list-style-type: none"> o Details_
[EasyDNNnews:MainMedia:Widht:600:Height:300]	Description: Token has two parameters Width and Height. IT is the size in pixels of the media that will be shown	<ul style="list-style-type: none"> o Details_
[EasyDNNnews:IfExists:MainImageTitle], [EasyDNNnews:EndIf:MainImageTitle]	Description: Checks if article image is set and it has title set and then displays content between the tokens otherwise the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:IfExists:MainImageDescription] [EasyDNNnews:EndIf:MainImageDescription]	Description: Checks if article image is set and it has description set and then displays content between the tokens otherwise the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:MainImageTitle]	Description: Checks if article image is set and it	<ul style="list-style-type: none"> o List_ o Details_

	has title set and then displays image title otherwise it displays nothing.	
[EasyDNNnews:MainImageDescription]	Description: Checks if article image is set and it has description set and then displays image description otherwise it displays nothing.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:IfExists:Gallery] [EasyDNNnews:EndIf:Gallery]	Description: Checks if article gallery is set. If it is then it displays content between the tokens otherwise the content between tokens is deleted.	Details_
[EasyDNNnews:IfNotExists:Gallery]", "[EasyDNNnews:EndIf:Gallery]	Description: Checks if article gallery is set. If it is not then it displays content between the tokens otherwise the content between tokens is deleted.	Details_
[EasyDNNnews:GravityGallery]	Description: Checks if article gallery is set and the gallery display type is set to Gravity gallery then it displays gallery media.	Details_
[EasyDNNnews:GalleryBackLink]	Description: Displays link to EasyDNNgalery module showing media in Gravity display type.	Details_
[EasyDNNnews:IfExists:GalleryBackLink] "[EasyDNNnews:EndIf:GalleryBackLink]	Description: Checks if link is set to EasyDNNgallery module. If it is then it displays content between the tokens otherwise the content between tokens is deleted.	Details_
Dates		
[EasyDNNnews:PublishDateShort]	Description: Publish date. Example: 11/27/2011	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:PublishDateTime]	Description: Publish date and time. Example: 11/27/2011 2:35:00 PM	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:PublishDate]	Description: Publish date with day and month names. Example: Sunday, November 27, 2011	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:PublishYear]	Description: Publish year. Example: 2011	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Month]	Description: Publish month.	<ul style="list-style-type: none"> o List_ o Details_

	Example: 11	
[EasyDNNnews:PublishDay]	Description: Publish day. Example: 27	<ul style="list-style-type: none"> ○ List_ ○ Details_
[EasyDNNnews:PublishMonthString]	Description: Short publish month. Example: Nov, Dec, Oct...	<ul style="list-style-type: none"> ○ List_ ○ Details_
[EasyDNNnews:FormatedDate:dateformat]	Description: Displays article published date in various formats. <i>dateformat</i> parameter is Microsoft standard date and time format string. For a full list of examples visit http://msdn.microsoft.com/en-us/library/az4se3k1.aspx . Examples: [EasyDNNnews:FormatedDate:dd,MM,yy]- output: 23,04,13 [EasyDNNnews:FormatedDate:ddd-MMM-yy]- output: Tue-Apr-13	<ul style="list-style-type: none"> ○ List_ ○ Details_
[EasyDNNnews:FormatedLastModifiedDate:dateformat]	Description: Displays article last modified date in various formats. <i>dateformat</i> parameter is Microsoft standard date and time format string.	<ul style="list-style-type: none"> ○ List_ ○ Details_
[EasyDNNnews:FormatedExpireDate:dateformat]	Description: Displays article expire date in various formats. <i>dateformat</i> parameter is Microsoft standard date and time format string.	<ul style="list-style-type: none"> ○ List_ ○ Details_
Categories		
[EasyDNNnews:Categories separator=", " nolink last color]	Description: Shows all article categories separated by comma with active link. Example: <u>Category1</u> , <u>Category2</u> , <u>Category3</u> separator="" - the content placed between quotation marks will be displayed between the categories. By default the categories will be separated with comma “,”. nolink - this option will display the categories only as a text without a link. last - this option will display only the last category that article is in.	<ul style="list-style-type: none"> ○ List_ ○ Details_

	color - this option will display category color name. If none is set it display default.	
[EasyDNNnews:Categories:Description]	Description: Return description of first category.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:Categories:Image:Width:140:Height:140:Resize:Crop]	Description: Return relative path to first category image. Parameters width, height and resize are optional. Width:140 - width of the thumbnail in pixels. Height:140 - height of the thumbnail in pixels. Resize - resize method. Possible values: Crop, Proportional.	<ul style="list-style-type: none"> o
Tags		
[EasyDNNnews:Tags separator=", " nolink]	Description: Shows all article tags separated by comma with active link. Example: <u>Tag1</u> , <u>Tag2</u> , <u>Tag3</u> separator="" - the content placed between quotation marks will be displayed between the tags. By default the tags will be separated with comma “,”. nolink - this option will display the tags only as a text without a link.	<ul style="list-style-type: none"> o List_ o Details_
Previous next article		
[EasyDNNnews:IfExists:PreviousArticleLink] [EasyDNNnews:EndIf:ArticlePreviousNext]	Description: Checks if article has previous or next article. If it has then displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:IfExists:PreviousArticleLink] [EasyDNNnews:EndIf:PreviousArticleLink]	Description: Checks if article has previous article. If it has then it displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:PreviousArticleLink]	Description: Displays previous article link	Details_
[EasyDNNnews:PreviousArticleTitle]	Description: Displays previous article title	Details_

[EasyDNNnews:PreviousArticle:IfExists:Image] [EasyDNNnews:PreviousArticle:EndIf:Image]	Description: Checks if previous article has image. If it does then displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:PreviousArticle:IfNotExists:Image] [EasyDNNnews:PreviousArticle:EndIf:Image]	Description: Checks if previous article has image. If it does not then it displays content between the tokens. If it does the content between tokens is deleted.	Details_
[EasyDNNnews:PreviousArticle:Image:Width:140:Height:140:Resize:Crop]	Description: Displays previous article image.	
[EasyDNNnews:IfExists:NextArticleLink] [EasyDNNnews:EndIf:NextArticleLink]	Description: Checks if article has next article. If it has then it displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:NextArticleLink]	Description: Displays next article link	Details_
[EasyDNNnews:NextArticleTitle]	Description: Displays next article title	Details_
[EasyDNNnews:NextArticle:IfExists:Image] [EasyDNNnews:NextArticle:EndIf:Image]	Description: Checks if next article has image. If it does then it displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:NextArticle:IfNotExists:Image] [EasyDNNnews:NextArticle:EndIf:Image]	Description: Checks if next article has image. If it does not then it displays content between the tokens. If it does not the content between tokens is deleted.	Details_
[EasyDNNnews:NextArticle:Image:Width:140:Height:140:Resize:Crop]	Description: Displays next article image.	Details_
Comments		
[EasyDNNnews:IfExists:Comments] [EasyDNNnews:EndIf:Comments]	Description: Checks if article has comments. If it has then it displays content between the tokens. If it does not the content between tokens is deleted.	<ul style="list-style-type: none"> o Details_ o List_
[EasyDNNnews:IfNotExists:Comments] [EasyDNNnews:EndIf:Comments]	Description: Checks if article has comments. If article does not have comments then it displays content between the tokens. If it does not the content between tokens is deleted.	<ul style="list-style-type: none"> o Details_ o List_
[EasyDNNnews:Comments]	Description: Number of comments.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnewsComment:DateAdded]	Description: Comment added date..	<ul style="list-style-type: none"> o Comments_
[EasyDNNnewsComment:Author]	Description: Comment author.	<ul style="list-style-type: none"> o Comments_
[EasyDNNnewsComment:GravatarImage]	Description: Shows comment's authors Gravatar image.	<ul style="list-style-type: none"> o Comments_

[EasyDNNnewsComment:Comment]	Description: Displays comment.	o Comments_
Article link		
[EasyDNNnews:ArticleLink]	Description: Link to article details.	o List_
Paid content		
[EasyDNNnews:PaidContentStart]	Description: Marks the start of paid content.	o Article content
[EasyDNNnews:PaidContentEnd]	Description: Marks the end of paid content.	o Article content
[EasyDNNnews:UnPaidContentStart]	Description: Marks the start of non-paid content which is displayed when user does not have privileges to see the paid content.	o Article content
[EasyDNNnews:UnPaidContentEnd]	Description: Marks the end of non-paid content which is displayed when user does not have privileges to see the paid content.	o Article content
Author profile related tokens		
[EasyDNNnews:IfExists:AuthorProfile]	Description: This token marks the start of the profile of the author. The following tokens should be placed between the start and end profile tokens:	o Details_
[EasyDNNnews:Author:FirstName]	Description: DNN name of the author (user).	o Details_ o List_
[EasyDNNnews:Author:LastName]	Description: DNN name of the author (user).	o Details_ o List_
[EasyDNNnews:Author:FullInfo]	Description: Author's biography that will be displayed in Lightbox. Author's biography can be localized by editing the „FullBioText.Text” record into .rscx file.	o Details_ o List_
[EasyDNNnews:Author:ShortInfo]	Description: A short info about the author which appears on the page.	o Details_ o List_
[EasyDNNnews:Author:DateAdded]	Description: Date of when author's profile is added.	o Details_ o List_
[EasyDNNnews:Author:Link]	Description: Displays HTML a tag with link which will list all author's articles.	o Details_ o List_
[EasyDNNnews:Author:LinkID]	Description: Displays a URL link which will list all author's articles.	o Details_ o List_
[EasyDNNnews:Author:RSSURL]	Description: Displays a link to the author's rss.	o Details_ o List_
[EasyDNNnews:Author:Contact]	Description: Displays the author's contact form in Lightbox.	o Details_ o List_
[EasyDNNnews:Author:Image:Width:65:Height:50:Resize:Crop]	Description: Displays the author's photo or avatar. It is possible to set: width, height, resize (Crop or Proportional).	o Details_ o List_
[EasyDNNnews:Author:Facebook]	Description: A link to the author's Facebook page.	o Details_ o List_
[EasyDNNnews:Author:Twitter]	Description: A link to the author's Twitter page.	o Details_ o List_
[EasyDNNnews:Author:GooglePlus]	Description: A link to the author's Google+ page.	o Details_ o List_
[EasyDNNnews:Author:LinkedIn]	Description:	o Details_

	A link to the author's LinkedIn page.	o List_
[EasyDNNnews:EndIf:AuthorProfile]	Description: This token marks the end of the author's box.	o Details_ o List_
[EasyDNNnews:IfExists:AuthorGroup]	Description: Marks the start of the profile group. The following tokens should be placed between the start and end group tokens:	o Details_
[EasyDNNnews:Author:GroupName]	Description: Displays the group's name.	o Details_
[EasyDNNnews:Author:GroupInfo]	Description: Displays the group's info.	o Details_
[EasyDNNnews:Author:GroupContact]	Description: Opens the group's contact form in Lightbox.	o Details_
[EasyDNNnews:Author:GroupImage:Width:65:Height:50:Resize:Crop]	Description: Displays the author's photo or avatar. It is possible to set width, height and resize option (crop or proportional).	o Details_
[EasyDNNnews:Author:GroupFacebook]	Description: A link to the group's Facebook page.	o Details_
[EasyDNNnews:Author:GroupTwitter]	Description: A link to the group's Twitter page.	o Details_
[EasyDNNnews:Author:GroupGooglePlus]	Description: A link to the group's Google+ page.	o Details_
[EasyDNNnews:Author:GroupLinkedIn]	Description: A link to the group's LinkedIn page.	o Details_
[EasyDNNnews:EndIf:AuthorGroup]	Description: This token marks the end of the group's box. All the box related tokens should be placed between the start and end group tokens.	o Details_
[EasyDNNnews:Author:DNNProfileLink]	Description: Displays link to the DNN user profile of article author. Example: http://www.mywebsite.com/ActivityFeed/tabid/60/userId/1/Default.aspx	o List_ o Details_
Social Sharing tokens		
[EasyDNNnewsSystemToken:SysFacebookLikeButton]	Description: Facebook Like button.	o List_ o Details_
[EasyDNNnewsSystemToken:SysFacebookShareButton]	Description: Facebook Share button.	o List_ o Details_
[EasyDNNnewsSystemToken:SysTwitter]	Description: Twitter Button.	o List_ o Details_
[EasyDNNnewsSystemToken:SysGooglePlus]	Description: Google Plus button.	o List_ o Details_
[EasyDNNnewsSystemToken:SysAddThis]	Description: AddThis service button with Facebook, Twitter and Google Plus.	o List_ o Details_
Events		
[EasyDNNnews:EventDate]	Description: Displays a date formatted according to an event type. Example: The event starts and ends on the same day. It is not all-day event: 7/4/2012 12:00 AM - 16:00 PM .	o List_ o Details_

	<p>The event last for more than one day. It is all-day event:</p> <p>7/4/2012 12:00 AM - 7/5/2012 12:00 PM</p> <p>The event starts and ends the same day. It is all day event:</p> <p>7/4/2012</p> <p>The event last for more than one day. It is all-day event:</p> <p>7/4/2012 - 7/5/2012</p>	
[EasyDNNnews:EventStartDate]	<p>Description: Start date of the event. Example: 7/4/2012</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartTime]	<p>Description: Start time of the event.</p> <p>Example: 12:00 PM</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndDate]	<p>Description: End date of the event. Example: 7/5/2012</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndTime]	<p>Description: End time of the event.</p> <p>Example: 12:00 PM</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartDay]	<p>Description: Start day of event. This will display only day in month. Example: 5</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartMonth]	<p>Description: Start month of event. This will display only month number. Example: 7</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartYear]	<p>Description: Year of event. This will display only year. Example: 2012</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndDay]	<p>Description: End day of event. This will display only day in month. Example: 6</p>	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndMonth]	<p>Description: End month of event. This will display only month number. Example: 7</p>	<ul style="list-style-type: none"> o List_ o Details_

[EasyDNNnews:EventEndYear]	Description: Year when event ends. This will display only year. Example: 2012	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartMonthNameShort]	Description: Starting month of event. This will display short month name. Example: Jun	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndMonthNameShort]	Description: Ending month of event. This will display short month name. Example: Jul	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartMonthNameLong]	Description: Starting month of event. This will display full month name. Example: July	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndMonthNameLong]	Description: Ending month of event. This will display full month name. Example: August	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartDayNameShort]	Description: Starting day of event. This will display short day name. Example: Wed	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndDayNameShort]	Description: Ending day of event. This will display short day name. Example: Fri	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventStartDayNameLong]	Description: Starting day of event. This will display full day name. Example: Wednesday	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventEndDayNameLong]	Description: Ending day of event. This will display full day name. Example: Friday	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventTimeZone]	Description: Displays time zone of an event. Example: Central European Standard Time	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:EventFormattedStartDate:dateformat]	Description: Displays event start date in various formats. <i>dateformat</i> parameter is Microsoft standard date and time format string. Banners module integration		
[EasyDNNnews:Banners:Source:Portal:Type:banner:Group:Group1:Count:1:Repeat:3]	Description: This token enables integration with DNN Banners module. For this token to work you need to setup Vendors and their banner on the portal or host. Token has following options: Source: Select source for the banners. - possible values: portal or host Type: Select a type of Banner to display. - possible values: Banner, MicroButton, Button, Block, SkyScraper, Text, Script, Group: Name of the Banners group. Count: Number of banners to display.	<ul style="list-style-type: none"> o List_ o Details_

	Repeat: If we are listing articles repeat banners after n articles.	
Tokens available in article content		
[EasyDNNGallery 1 Width 200 Height 200 position resizecrop False lightbox False title False description False redirection False LinkText]	<p>Description: This token enables displaying media form the article galley inside article content. Options and possible values:</p> <p>EasyDNNGallery 1 - id of the image to display.</p> <p>Width 200 - width of the thumbnail to display.</p> <p>Height 200 - height of the thumbnail to display.</p> <p>position left - name of CSS class that will be added to the div that surrounds the image</p> <p>resizecrop False - True/False - resize and crop thumbnail. If True proportional metod of resizing is used.</p> <p>lightbox False - True/False -enable opening media in lightbox.</p> <p>title False - True/False - show media title.</p> <p>description False - True/False - show media description.</p> <p>redirection False - True/False - If image has set redirection URL on click rediredt to tht URL.</p> <p>LinkText - Instead of thumbnail display text link.</p>	o Article content
[EasyDNNnewsDocument 4330]	<p>Description: Displays download link for the article document. Options: EasyDNNnewsDocument 4330 - id of the document.</p>	o Article content
[EasyDNNnewsLink 3557]	<p>Description: Displays link defined in the article link section. Options: EasyDNNnewsLink 3557 - id of the link.</p>	o Article content
[EasyDNNnews:IfExists:GalleryImage:Position n] [EasyDNNnews:GalleryImage:Position:Width:200:Height:200:Resize:Proportional] [EasyDNNnews:EndIf:GalleryImage]	<p>Description: Set of tokens to display image from the article gallery based on the image position in the gallery. First the check if performed if image at specified position exists. If it does then the thumbnail of the image is displayed. Options: GalleryImage:Position - position of the image in the gallery.</p>	o Article content

	Width:200 - width of the thumbnail to display Height:200 - height of the thumbnail to display - Resize:Proportional - Crop/ Proportional - method of thumbnail resizing.	
Tokens available in Catalog view		
[EasyDNNnews:CatalogBreadCrumbTitle]	Description: Category name in BreadCrumb pane. Example: Category1	<ul style="list-style-type: none"> o List_Catalog_ o Details_Catalog_ <p>It is placed inside <!-- BreadCrumbTemplate--> pane</p>
[EasyDNNnews:CatalogBreadCrumbLink]	Description: Display BreadCrumb link of current category position. Example: Category 1 > category 2	<ul style="list-style-type: none"> o List_Catalog_ o Details_Catalog_ <p>It is placed inside <!-- BreadCrumbTemplate--></p>
[EasyDNNnews:CatalogCategoryTitle]	Description: Displays category title. Example: Category 1	<ul style="list-style-type: none"> o List_Catalog_ o Details_Catalog_ <p>It is placed inside <!-- HeaderTemplate--> <!--CategoryTemplate--></p>
[EasyDNNnews:CatalogCategoryDescription]	Description: Displays category description.	<ul style="list-style-type: none"> o List_Catalog_ o Details_Catalog_ <p>It is placed inside <!-- HeaderTemplate--> <!--CategoryTemplate--></p>
[EasyDNNnews:CatalogCategoryURL]	Description: Displays category link.	<ul style="list-style-type: none"> o List_Catalog_ o Details_Catalog_ <p>It is placed inside <!-- CategoryTemplate--></p>
[EasyDNNnews:CatalogCategoryImage]	Description: Category image. How to use it template: />	<ul style="list-style-type: none"> o List_Catalog_ <p>It is placed inside <!-- CategoryTemplate--></p>
[EasyDNNnews:CatalogCategoryImage:Width:300:Height:200]	Description: Category image with width and height set to 300x200.	<ul style="list-style-type: none"> o List_Catalog_ <p>It is placed inside <!-- CategoryTemplate--></p>
[EasyDNNnews:CatalogCategoryImage:Visibility]	Description: If the image does not exist it does not shows the element where is set. Example: <div class="imageclass" [EasyDNNnews:CatalogCategoryImage:Visibility]><img src="[EasyDNNnews:CatalogCategoryImage]" </></div>	<ul style="list-style-type: none"> o List_Catalog_ <p>It is placed inside <!-- CategoryTemplate--></p>
Unsorted tokens		
[EasyDNNnews:NumberOfViews]	Description: Number of article views.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:LocalizedText:SomeText.Text]	Description: All words in template can be localized by adding SomeText.Text record with value into .rescx file.	<ul style="list-style-type: none"> o List_ o Details_
[EasyDNNnews:PageBreak]	Description:	<ul style="list-style-type: none"> o Article content

	With this token article can be split into multiple pages. Put this in the text where you want to split the article.	
[EasyDNNnews:CurrentPageURL]	Description: Display current article URL.	o Details_
[EasyDNNnews:ItemOrderClasses]	Description: It displays two classes for use in CSS. First one is "odd" or "even" and the second one is "itemnumber".	o List_
[EasyDNNnews:ArticleID]	Description: Displays article's id. Example: 34	o List_ o Details_
[EasyDNNnews:FeaturedArticle]	Description: If the article is set as featured article it displays EDN_featured otherwise it displays nothing. Example: EDN_featured	o List_ o Details_
[EasyDNNnews:IfExists:FeaturedArticle] [EasyDNNnews:EndIf:FeaturedArticle]	Description: Checks if article is featured. If it is the content between the tokens is displayed otherwise the content between tokens is deleted.	o List_ o Details_
[EasyDNNnews:IfNotExists:FeaturedArticle] [EasyDNNnews:EndIf:FeaturedArticle]	Description: Checks if article is featured. If it is not then the content between the tokens is displayed otherwise the content between tokens is deleted.	o List_ o Details_ o
[EasyDNNnews:ActiveArticle]	Description: If there are two or more instances of the EasyDNNnews module on the same page and one opens details of an article in other instances that are listing articles [EasyDNNnews:ActiveArticle] will be replace with EDN_activeclass on that opened article otherwise it displays nothing. Example: EDN_activeclass	List_
[EasyDNNnews:ClientBasePath]	Description: Displays applications virtual root path on the server.	o List_ o Details_
[EasyDNNnews:ModuleID]	Description: Displays current module id.	o List_ o Details_
[EasyDNNnews:SendToAFriend]	Description: Displays link that will open popup to send link to email.	o Details_
[EasyDNNnews:Print:ArticleDetails]	Description: Displays button that will open popup to print article details.	o Details_
[EasyDNNnews:IfExists:AnyArticle] [EasyDNNnews:EndIf:AnyArticle]	Description: Checks any article is listed. If it is the content between the tokens is	o List_ It is placed inside <!-- ArticleRepeat:After -->

	displayed otherwise the content between tokens is deleted.	
[EasyDNNnews:IfNotExists:AnyArticle] [EasyDNNnews:EndIf:AnyArticle]	Description: Checks any article is listed. If it is not the content between the tokens is displayed otherwise the content between tokens is deleted.	<ul style="list-style-type: none"> o List_ It is placed inside <!-- ArticleRepeat:After -->
